Columbia Summer Undergraduate Research Experiences in Mathematical Modeling

May 31 - August 5, 2022

The CSUREMM program offers an opportunity for undergraduate students interested in mathematical modeling and scientific computing, regardless of their major, to immerse themselves into an interdisciplinary, experiential, and hands-on experience. Throughout the program, participants will be exposed to the full range of activities involved in pursuing scientific research, including project design, data analysis and interpretation, modeling and simulation, literature review, scientific writing, and interactive collaboration. Guest speakers, mini-courses, and social events are also incorporated into the program. By the end of the experience, participants will walk away with a broad understanding of mathematical modeling and scientific computing, knowledge on the scientific research process, experience in presenting academic research, and a network of peer and mentor relationships.

Background

Previous work in linear algebra, probability, ordinary differential equations, and some experience with programming are highly recommended, but not mandatory.

Eligibility

The program is open to any continuing Barnard/Columbia undergraduate student, independent of U.S. residency. Women and historically underrepresented minorities are particularly encouraged to apply.

Application

For your application, you will need:
- One-page CV/resume
- Unofficial university transcripts
- Name of one faculty who can act as your reference
  (a reference letter is not required)

https://forms.gle/GiaybxJUWxPvaj9FA

Application deadline

• 5:00 PM (EST), March 11th, 2022

Contact

For further inquiries, please contact the program organizers:
- George Dragomir dragomir@math.columbia.edu
- Ivan Corwin corwin@math.columbia.edu

The 2022 CSUREMM program is made possible with support form the following departments and institutes at Columbia University

Department of Mathematics
Department of Statistics
Data Science Institute (DSI)
Herbert and Florence Irving Institute for Cancer Dynamics (IICD)
and by the NSF through DMS:1937254 - Research Training in Applied Mathematics at Columbia University.
