REQUEST FOR SUMMER 2013 SCHOOL CREDIT

BARNARD MATHEMATICS DEPARTMENT

Name of student ______________________________________________________________

Contact information:

   E-mail me at _______________________________________________________________

   Call me at ________________________________________________________________

If this request is for approval of a Columbia University summer course, you do not need to fill out the rest of this request. You will still need to submit a completed Barnard College Summer Course Approval Form to the Registrar. Columbia course approval is automatic.

Check list:

   — Completed Barnard College Summer Course Approval Form
   — Description of summer course. Two copies are needed (one for Registrar and one for the department)
   — Schedule of summer course. Two copies are needed (one for Registrar and one for the department)
   — Summer 2013 School Worksheet
SUMMER 2013 SCHOOL WORKSHEET

BARNARD MATHEMATICS DEPARTMENT

1. Name of summer school _______________________________________________________

2. Name and number of course __________________________________________________

3. Which Barnard course is similar to this course? _________________________________

4. Starting and ending dates of summer session ___________________________________

5. Is this at least 5 weeks?     Yes     No

6. Have you already taken this course?   Yes     No

7. Please circle the class meeting times below, taking into account holidays such as July 4.

8. How many days does your class meet in total? _________________________________

9. How many minutes in each class meeting? _____________________________________

10. How many hours does your course meet in total? ____________________________

   ____________ x ____________

   minutes per meeting    total days in session           =  ____________

   __________________________________________                                total course hours

60mins

For comparison purposes,
A 3-point Barnard Tuesday, Thursday spring semester Calculus course meets for : (75 mins. X 28 days) / 60 mins.
A summer school equivalent should meet for at least this many hours: 36 hours

A College Algebra and Analytic Geometry course meets for : (75 mins. X 42 days) / 60 mins. = 52.5 hours
A summer school equivalent should meet for at least 45 hours.

12. If you are requesting credit for a calculus course, does the second segment of your courses sequence
include Taylor’s theorem and infinite series?

   Yes     No

*Please answer even if you are only taking the first segment of this sequence.*

If NO, your course moves too slowly to receive full credit. However, you may still receive 3 points for taking two
courses in such a sequence.
